PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1A Padali Ammunition Depot Elban is located
25X1A 14 kilometers (km) southwest of Padali and
approximately 50 km southwest of Komsomolsk
(Figure 1). The installation is associated with
Padali Ammunition Plant Elban [REDACTED]

The ammunition depot consists of 2 secured
areas which cover approximately 550 acres and
contains 134 revetted ammunition storage bunk-
ers in the large northern area (F1) and 9 re-
vetted ammunition storage bunkers in the south-
ern area (F2). A small support facility con-
taining approximately 3 buildings is located
south of the larger storage area (Figures 2-6).

A storage area (E) which is probably
associated with the ammunition depot is located
9.5 km south. It covers 90 acres and contains
18 general storage buildings within a double
fenced area and 17 support buildings outside
the secured area.

The area is covered on [REDACTED]
KEYHOLE missions of interpretable photog-
raphy between [REDACTED]
Comparative analysis reveals that Area F1
was apparently under construction in [REDACTED]
however, poor quality photography precluded
confirmation of its completion until [REDACTED]
Area E was first observed in [REDACTED]

DESCRIPTION OF INSTALLATION

Railroad Service

A single-track line serves the installation.
One trackside dock (A) is located in Area F1
and 9 rail-end bunkers are located in Area F2.

Road Service

An improved secondary road connects the
two ammunition storage areas with the ammuni-
tion plant and with Area E.

Administration and Troop Housing Areas

Administration and billeting facilities are
probably located at the ammunition plant.

General Storage Area

Area E is double fenced, surrounded by a

firebreak, and contains 18 general storage build-
ings.

Ammunition Storage Areas

Area F1 is secured, surrounded by a fire-
break, and contains 134 revetted storage bun-
kers. A road-to-rail transfer point is within
the perimeter.

Area F2 is secured, surrounded by a fire-
break, and contains 9 revetted storage bunkers.

Other Buildings

Three general support buildings (probably
maintenance and storage buildings) are located
north of Area F2.
